ELISpot Workshop

Wednesday, June 11th 2014 | 11:00 AM-2:00 PM

UPCI Research Pavilion at Hillman Cancer Center
2nd Floor Conference Room
5117 Centre Ave.
Pittsburgh, PA 15213

Topics include:

• Improved performance of T-cell, B-cell and monocyte Elispot assays
• New Elispot plates (including 384 well, strip and Fluorospot plates)
• Antibody choices and combinations
• Fluorospot for the assessment of dual and triple cytokine/antibody secretion patterns
• Innovative peptide and peptide pool formats, peptide stability and storage
• Freezing and test media
• Automated cell counting and viability/apoptosis assessment
• Sample preparation including options for preserving PBMC functionality in multi-center trials and after prolonged storage
• Statistical considerations and response definition
• Evaluation of Elispot plates
• Trouble Shooting for commonly seen problems

Presented by:

• Sylvia Janetzki, MD | ZellNet Consulting, Inc
