SEMINAR ANNOUNCEMENT

for
The Cancer Epidemiology and Prevention Program
of the University of Pittsburgh Cancer Institute

Thursday, February 18, 2016
12:00 - 1:00 pm

UPMC Cancer Pavilion
Herberman Conference Center, Room 201B

“Meet the 2015-2016 T32 Postdoctoral Fellows”

Yvonne L. Eaglehouse, PhD
Tiffany Katz, PhD
Tracy T. Smith, PhD

The T32* Postdoctoral Fellows of the Cancer Epidemiology and Prevention Program have been very productive in their research fields. Join us to learn about their research, teaching, and professional development activities. Each fellow will present their research background and provide an update on their activities supported by the T32 training grant in cancer etiology and prevention. Dr. Eaglehouse is investigating the feasibility of behavioral lifestyle interventions for cancer survivors under the guidance of Dr. Lesley M. Butler. Dr. Katz is currently mentored by Drs. Steffi Oesterreich and Lesley M. Butler in population-based research on prolactin and breast cancer risk. Dr. Smith is working with Dr. Eric Donny on tobacco regulatory science and its implications for cancer prevention. We hope you can join us to learn more about our fellows.

Hosted by: Drs. Thomas Kensler & Jian-Min Yuan
LIGHT REFRESHMENTS PROVIDED
Contact Person: Brooke Spencer
