March

Work-in-Progress

Molecular and Cellular Cancer Biology Program
University of Pittsburgh Cancer Institute

Schedule

Wednesdays
9:00-10:00 AM

March 2, 2016:

No Work in Progress Meeting

March 9, 2016: Zhuan Zhou, Post Doc
Department of Cell Biology
Dr. Wan’s Lab
“The Deubiquitinase USP11 Stabilizes XIAP and Confers Mammary Epithelial Cell Transformation and Cancer Cell Survival”

March 16, 2016: Leizhen Wei, MD., PhD
Department of Microbiology and Molecular Genetics
Dr. Lan’s Lab
“Acidic domain of Cockayne syndrome B protein is necessary for transcription coupled recombination via RAD52 suoylation”

March 23, 2016: Justin Roncaioli, Research Assistant
Department of Pharmacology
Dr. O’Sullivan Lab
“Antagonistic Roles of PARP1 and PARG in the Alternate Lengthening of Telomeres Cancer Pathway”

March 30, 2016: Lu Yang, Visiting Scholar
Department of Microbiology and Molecular Genetics
Dr. Lan’s Lab
“Tankyrase1 initiates single strand break repair at damaged telomeres through its interaction with TRF1”

Hosted By: Bennett Van Houten, PhD
Contact Person: Wade Nixon – nixonw@upmc.edu
