SPECIAL GUEST LECTURE

What Can We Learn From Cancer to Treat Alzheimer's Disease?

Thursday, January 5, 2017
12:00pm – 1:30pm
Starzl Biomedical Science Tower
Room S100A

Jane A. Driver, MD, MPH
Harvard Medical School
Brigham and Women's Hospital
VA Boston Medical Center
Dana Farber Cancer Center

On the surface, cancer and neurodegenerative diseases could not seem more different, but they have profound epidemiologic, genetic and biological overlap.

Learn how untangling the complex connections between these two families of diseases is leading to insights into the pathophysiology and treatment for both.
